Enclosure: Letter from Andrew Strong requesting appeal:

To install a stairway in my 1920 home and convert back to a single-family. Sometime in the 1960's this home was converted into a two-family by removing the stairway. The cavity is 35" wide where required is 36". I also measured 113" tall meaning I would have 14 steps at 8 1/16"+ where required is 8".
