**Reference: Water Main Installation**

Road Closure - **S. Business Drive** (CTH 'OK') from Behrens Parkway to north of Carmen Avenue  
Sheboygan, Wisconsin

Dear Citizen,

As part of the Sheboygan Water Utility's ongoing efforts to provide safe, reliable, drinking water to the community, we will be installing a water transmission main in S. Business Drive starting on March 14, 2013. The construction project will be the installation of a roughly 3,200 lineal feet of 20" water transmission main in S. Business Drive starting at Behrens Parkway, going to 400 feet north of Carman Avenue. This work will continue into May 2013. The vast majority of the work will take place in the westerly half of the roadway. During this time S. Business Drive will be closed to through traffic but it will be open to local traffic so that you can drive to your homes and businesses. This work along with other utility relocation work is required to be completed before the CTH 'OK' road reconstruction work begins later this Spring.

The Sheboygan Water Utility is paying the majority of the costs for this project. There will be no costs assessed directly to you for this work. There will be some inconveniences during construction with road closures and temporary water shut downs. We will work hard to minimize these as much as possible.

Prior to construction there are some things we would like you to know:

**The water main installation may affect access to people's driveways for a short period of time in the immediate area of pipe installation.** We will try to notify property owners ahead of time of these inconveniences.

**There will be water shut downs from time to time.** This will be for lowering a few existing water laterals and main tie-ins required. We will try to notify customers a day ahead of any shut downs, verbally or via door tags.

**Please let the Water Utility know, in advance, if access is required for any special need individuals in the construction zones.**

We understand that construction can be disruptive. We intend to minimize the inconveniences to you and your neighbors. If you have any questions, please contact me at 920-459-3839 or at [richdale@sheboyganwater.org](mailto:richdale@sheboyganwater.org).

Project updates can be found on our Utility website [sheboyganwater.org](http://sheboyganwater.org).

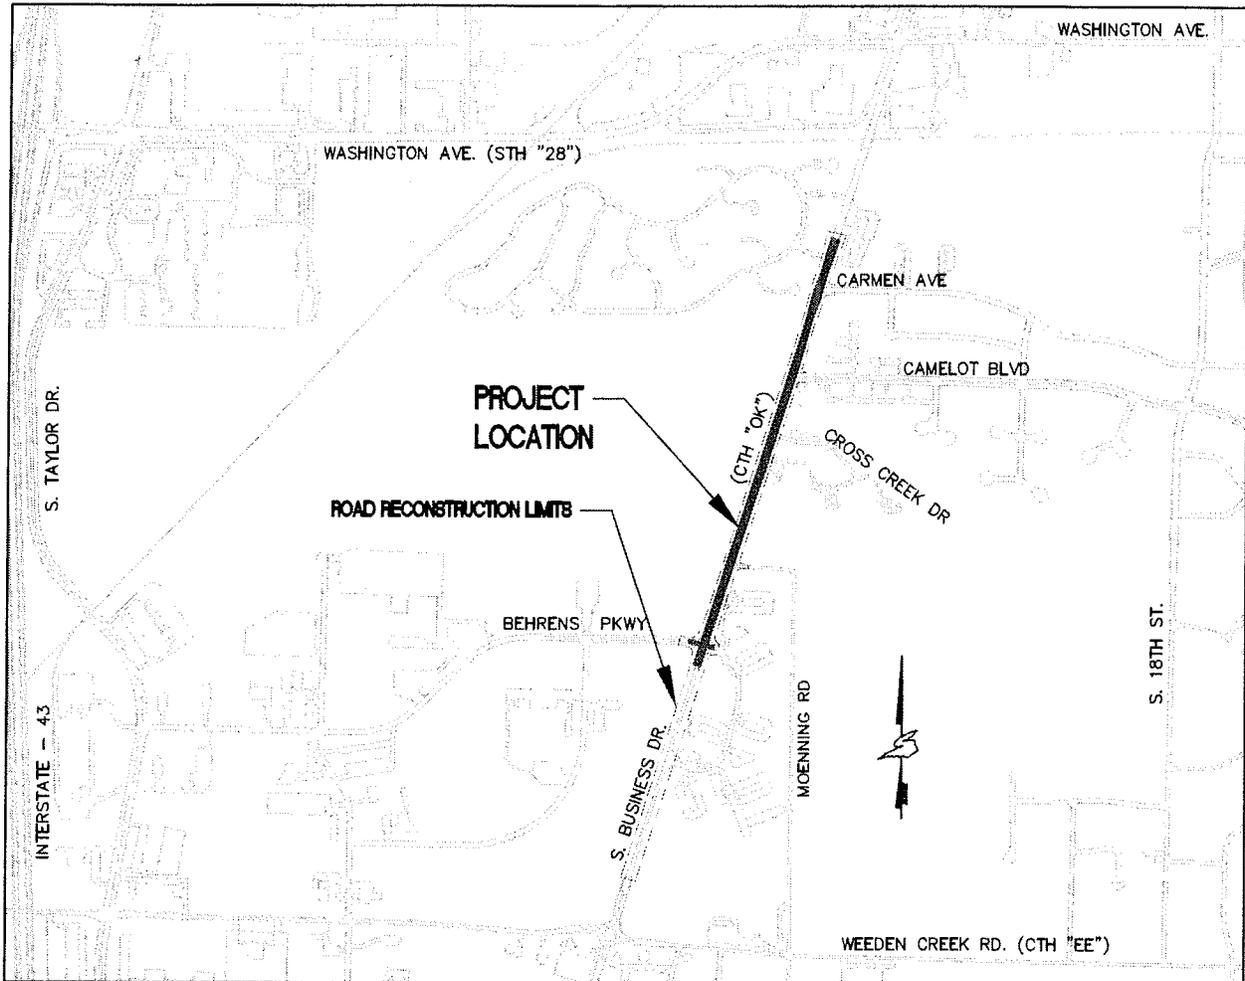

Sincerely,

Rich Dale P.E.  
Distribution Supervisor  
Sheboygan Water Utility
